

Andlers Ash Road/Hill Brow Road junction Hampshire Services

At the junction of Hill Brow Road and Andlers Ash Road, a new uncontrolled crossing point is proposed. The road surface here would be raised closer to pavement and resurfaced. This will slow vehicle speeds on entry to the village and highlight the crossing point.

A gateway feature is also proposed alongside signs directing drivers heading to the A3 to avoid the village centre. Together, these will indicate to drivers they are entering a village centre and should lower their vehicle speeds to drive appropriately.

Existing gateway sign in Liss
